

# CryptoSLAYER<sup>3.0</sup>

## POWER NEXT GENERATION MINERS

The Crypto Slayer 3.0 next generation power distribution unit is built with mining in mind. Designed to power 12 new generation miners with an 80 amp 3 phase input, providing 190 amps of output power. 50 amp switched circuit breakers mitigate nuisance tripping due to thermal conditions and allow for on/off control of output banks. Flexible options for vertical or horizontal mounting and an aluminum enclosure for heat dissipation.

### Specification

**Input Voltage** | 120V, 208V, 240V or 415V  
**Load** | 190 Amps of Single Phase Output  
80 Amps Three Phase Input  
**Circuit Breakers** | 6 x 50 Amp Circuit Breakers  
**Outlets** | 12 x IEC C-19s  
**Input Connection** | Internal Terminal Blocks  
**Temperature Rating** | 0C - +55 C  
**Humidity Rating** | 0 - 95% Non-Condensing  
**Dimensions** | 3.5" x 16.5" x 8"  
**Mounting** | Vertical or Horizontal Mount

### NEXT GENERATION FEATURES

Switched 50 Amp Circuit Breakers

Internal Power Cord Termination

Multiple Mounting Options

190 Amps of Single Phase Load

Single, Dual or Three Phase Input
